NovAtel Announces limited availability of WAAS G-II GUS Type-1 Receiver and WAAS G-II Signal Generator

The NovAtel GUS Type-1 Receiver and GUS Signal Generator products are employed in uplink stations for a number of SBAS systems at various stages of deployment. In order to manage component obsolescence issues, NovAtel has been issuing lifetime buy orders for certain components in order to support the future product demand. We have procured sufficient parts to support our anticipated demand from current customers of these products, based on the SBAS programs currently in place and supported by NovAtel products, but our lifetime production capability is limited by those quantities.

NovAtel Inc. is announcing limited availability of the:

**WAAS GUS Type-1 Receiver
WAAS GUS Signal Generator**

NovAtel will assure delivery of any orders received by:

June 30, 2014

After the above date, delivery will be subject to availability.

NovAtel will continue to support and repair these products until:

December 31, 2019

For a complete listing of NovAtel products at end of life, including the expiration of support and repair for those products, please refer to the discontinued products list on the NovAtel website at:
