COMPACT ENCLOSURE FEATURING DUAL ANTENNA, DUAL-FREQUENCY GNSS RECEIVER WITH RTK AND HEADING CAPABILITIES

HIGH PRECISION GNSS, COMPACT SIZE
The dual-frequency, dual antenna FlexPak6D is NovAtel’s latest addition to the powerful OEM6® family of receivers, offering heading and precise positioning for space constrained applications. Backward compatible with NovAtel’s popular FlexPak6™ form factor, the FlexPak6D provides the most efficient way to bring GNSS capable navigation and positioning products to market quickly. As with all NovAtel® OEM6 receivers, the FlexPak6D tracks GPS, GLONASS, Galileo and BeiDou signals.

DUAL ANTENNA INPUT
Dual-frequency, dual antenna input allows the FlexPak6D to harness the power of NovAtel CORRECT™ with RTK and ALIGN functionality. This makes the FlexPak6D ideal for ground vehicle, marine or aircraft based systems, providing industry leading GNSS multi-constellation heading and position data in static and dynamic environments.

EASY SYSTEM INTEGRATION AND INSTALLATION
The FlexPak6D provides numerous interfaces including RS-232 and RS-422 serial ports as well as a USB device. Standard interfaces are provided through conventional connectors, eliminating the need for hard to find and expensive custom cables.

DESIGNED FOR FLEXIBILITY
The modular nature of NovAtel’s OEM6 firmware provides users with the flexibility to configure the FlexPak6D for their unique application needs. Scalable, the FlexPak6D offers sub-metre to centimetre-level positioning and is field upgradeable with selected OEM6 family software options. Options include NovAtel CORRECT with RTK for centimetre-level real-time positioning, ALIGN for precise heading and relative positioning, GLIDE™ for decimetre-level pass-to-pass accuracy and RAIM for increased GNSS pseudorange integrity.
