

Receivers OEM719™

MULTI-FREQUENCY, BACKWARD COMPATIBLE GNSS RECEIVER INCLUDES ALL MODERN SIGNALS

HIGH PRECISION GNSS, BACKWARD COMPATIBLE SIZE

The multi-frequency OEM719 offers future ready precise positioning for space constrained applications. Advanced interference mitigation features maintain high performance in challenging environments. Form factor and pin compatible with NovAtel's popular OEM615™ and OEM617™ receivers, the OEM719 provides the most efficient way to bring powerful Global Navigation Satellite System (GNSS) capable products to market quickly. With centimetre level positioning utilizing TerraStar satellite-delivered correction services, the OEM719 ensures globally available, high performance positioning without the need for expensive network infrastructure. Anywhere. Anytime.

BUILT-IN FLEXIBILITY

The OEM719 uses a 555 channel architecture and can be configured in multiple ways for maximum flexibility. NovAtel's OEM7® firmware provides users with the ability to configure the OEM719 for their unique application needs. The OEM719 is scalable to offer sub-metre to centimetre level positioning, and is field upgradable to all OEM7 family software options. These options include ALIGN® for precise heading and relative positioning, GLIDE® for decimetre level pass-to-pass accuracy and SPAN® GNSS+INS for continuous 3D position, velocity and attitude. NovAtel CORRECT™ with RTK delivers centimetre level real-time positioning, or go base-free for centimetre and decimetre PPP solutions using TerraStar corrections.

To learn more about how our firmware solutions can enhance your positioning, please visit novatel.com/products/firmware-options.

DESIGNED WITH THE FUTURE IN MIND

The OEM719 is capable of tracking all current and upcoming GNSS constellations including GPS, GLONASS, Galileo, BeiDou, QZSS and NavIC. It is software upgradable to track upcoming signals as they become available.

FEATURES

- + 555 channel, all-constellation, multi-frequency positioning solution
- + Multi-channel L-Band supports TerraStar correction services
- + Advanced interference visualization and mitigation features
- + RTK, GLIDE and STEADYLINE® firmware options
- + Simple to integrate, small form factor with 20 g vibration performance rating
- + Compatible with existing OEM615 and OEM617 integrations
- + SPAN GNSS+INS functionality

FEATURES

- Field upgradeable software
- Differential GPS positioning
- Differential correction support for RTCM 2.1, 2.3, 3.0, 3.1, 3.2, 3.3, CMR, CMR+, RTCA and NOVATELX
- Navigation output support for NMEA 0183 and detailed NovAtel ASCII and binary logs
- Receiver Autonomous Integrity Monitoring (RAIM)
- GLIDE and STEADYLINE smoothing algorithms
- Interference Toolkit
- Outputs to drive external LEDs
- 2 Event inputs
- 1 Event output
- Pulse Per Second (PPS) output

FIRMWARE SOLUTIONS

- ALIGN
- SPAN
- RTK
- RTK ASSIST™
- TerraStar PPP
- API¹⁴

OPTIONAL ACCESSORIES

- VEXXIS® GNSS-500 and GNSS-800 series antennas
- ANT series antennas
- Mechanical mounting rails
- OEM7 Development Kit

¹ Typical values. Performance specifications subject to GNSS system characteristics, Signal-In-Space (SIS) operational degradation, ionospheric and tropospheric conditions, satellite geometry, baseline length, multipath effects and the presence of intentional or unintentional interference sources.

² Hardware ready for L3 and L5.

³ Designed for BeiDou Phase 2 and 3, B1 and B2 compatibility. B3 conditionally supported and subject to change.

⁴ E1bc support only. Hardware ready for E6bc.

⁵ GPS only.

⁶ Requires a subscription to a TerraStar data service. Subscriptions available from NovAtel.

⁷ Typical value. No almanac or ephemerides and no approximate position or time.

⁸ Typical value. Almanac and recent ephemerides saved and approximate position and time entered.

⁹ Time accuracy does not include biases due to RF or antenna delay.

¹⁰ Export licensing restricts operation to a maximum of 515 metres per second, message output impacted above 500 m/s.

¹¹ On the OEM719A, the MCX connector extends an additional 2.06 mm (0.081") from the board (71 mm dimension).

¹² Typical values using serial port communication without interference mitigation. Consult the OEM7 User Documentation for power supply considerations.

¹³ Requires mechanical mounting rails to meet 20 g; meets 7.7 g without rails.

¹⁴ Available in Q1 2018.
